

## MORE BLACK BOX CABLING INNOVATIONS

### Small cables mean big savings

Optimise space and cable handling in crowded cabinets, high-density data centres and in pathways with thin 28-AWG Slim-Net™ CAT6/CAT6A Ethernet patch cables.

[BLACK-BOX.EU/SLIMNET](http://BLACK-BOX.EU/SLIMNET)

### Largest selection of HDBaseT Recommended CAT5e/6/6A cables

For uncompromised performance, use Black Box cables. They're designed for demanding bandwidth-intensive applications, such as data networks, digital signage, control systems, CCTV, and more. Choose from shielded and unshielded cables.

# 3-SERIES CAT5E, CAT6, CAT6A HIGH-PERFORMANCE PATCH CABLES WITH OPTIONAL LOCKABILITY

These guaranteed-for-life, high-performance cables give you three levels of security depending on the optional locking pin option you choose. They're one of the simplest and most effective ways you can turn network ports into a Layer 1 security tool—when you need to.

## RED PIN: LOCKED

- Prevent unauthorized access and tampering of mission-critical and publicly accessible ports especially in government offices, lobbies, retail establishments and more
- Cable stays locked until you release it with the Removal Tool

## GREEN PIN: SECURED

- Prevent accidental disconnects, particularly in manufacturing and industrial applications
- Cable is released by squeezing the butterfly tabs; no tool required

## NO PIN: PROTECTED

- Even with no locking pin, the rugged, hard-polymer LockPORT™ boot and plug are integrated for better strength and to protect the cable
- Use these premium cables without a locking pin for your everyday network connections

LP50-RD

LP40-GN

## OPTIONAL LOCKING PINS AND REMOVAL KEY

Prevent accidental disconnects or unauthorized access

The Removal Key (sold separately) is constructed of the same hard-polymer as the boot. Keep some Locking Pins (sold separately) on hand in case you need to lock ports.
